Acknowledgements

► First off, I would like to thank Clevered and the mentors for giving me the opportunity to participate in this internship and helping me with my project, and to Mr. Ken for being able to see all our projects. Lastly, I thank my parents for letting me participate with the rest of the students in this internship.

About Me

My name is Lea AbiKhalil. I'm 12 years old and I study at Antonine Sisters School Jamhour. I love playing tennis and volleyball. I started coding with Clevered in January 2023 and now I love it so much!

About My Internship with Clevered

- At first, I wanted to see if I wanted to participate in this internship. After 1 session, I decided I should try my best to do well. Now, I finished my project with the help of my mentors. This internship has been a wonderful journey and I hope that Mr. Ken will approve of my project!

- I've earned 2 badges from Clevered:

- Rockstar Badge for timely submission of home assignment

- Rockstar Badge for Teamwork

About App

- App's Main Menu:

. This app is about a chatbot named Eddie . Eddie will ask you the most simplest general knowledge questions and you have to answer correctly or you'll lose.

 App's Introduction:

. Eddie is a chatbot that loves asking questions about general knowledge.

He asks you a few questions and you have to answer him with the most logical answers. If you answer correctly, Eddie will give you a positive response like, "Good job" or "Wow" . When your answer is incorrect, Eddie will respond like this "Oops, It's wrong" or "You lost, try again if you'd like" then directly moves on to the next question.

How do I use App

- Eddie, a chatbot will ask you a few simple questions that you have to answer. With the speak recognition I used, you have to speak out loud so the chatbot can hear you.

- Here is an example:

Eddie: "What currency is used in the U.S?"

You(speak loud and clear):"Dollar"
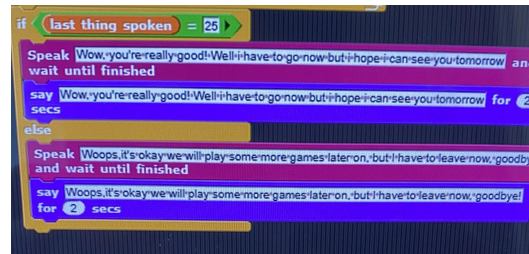

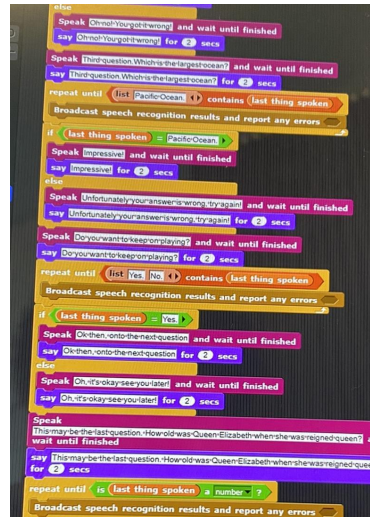

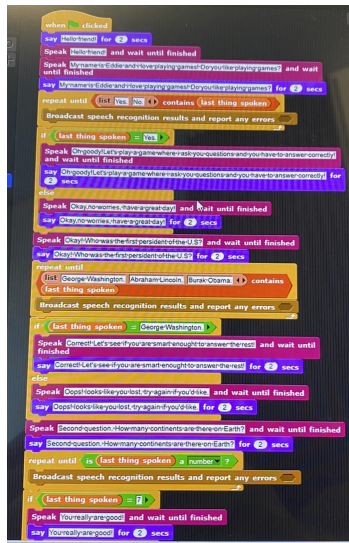

Eddie: "Correct ! Onto the next question"

Another way this could happen:

Eddie: "What currency is used in the U.S?"

You: "Euro"

Eddie: "Oops, you lost. Try again if you'd like!"

Option Name

Steps I used to do this app:
- Green Flag
- Say Block (2 seconds)
- Speaking Block(imported)
- Say Block (2 seconds)
-   Repeat Until Block+ Contains Block+ List (first slot)+Last thing spoken(second slot)
-   Listening Block
-   If-else Block + "=" block + Speaking block+ say block+ speaking block+ say block
-   (Repeat)
